Sound Rating [View All Sound Test](#)

**EXCELLENT ACOUSTICAL PERFORMANCE**

- ✓ H.O.A. recommended for lower sound transmission from both;
- ✓ **IMPACT SOUND**  
Noise created by collisions with the floor, i.e. jumping and running
- ✓ **AMBIENT SOUND**  
Noise created by talking, electronics etc.
- ✓ Promotes harmonious living environment
- ✓ Ideal for common construction over wood or concrete subfloors

**Applications:**

- Single family homes
- Multi-story construction homes
- Apartments
- Triplexes
- Condominiums
- College dormitories
- Military housing
- Classrooms
- Schools
- Hospitals
- Any new area where reduction of impact noise is desired

**The Perfect Underlayment for Multi-Story Flooring**

## Info - for moisture present areas

### PRO'S

- GreenGuard Certified
- Mould Resistant
- 100% VOC free
- 94% Recycled Materials
- Anti-fracture ( no movement transfer )
- Suitable for most internal substrates
- Float , nail down or glue down
- Underfloor heating approved
- Amazing Acoustic Reductions
- Moisture Protection vapour barrier
- Soft underfoot
- SPC hybrid , Laminate , Solid wood
- Need Fabric shears / scissors to cut

Supplied as the acoustic underlayment with Auslay Flooring's Casa Collection NBP.  
( no back padding fitted to the SPC hybrid plank )

Quietwalk Plus has very good acoustic reduction. It is ideal for moisture present areas. It eliminates substrate movement from transferring through to the floor board and also allows hybrid to float correctly when installed. The blue vapour barrier also enables adhesives to be spread directly onto it.

*The perfect underlayment for installing over timber floors or cracked concrete*

- SPC Hybrid flooring
- Laminate flooring
- Engineered and timber flooring

## Info - for no-moisture present areas

### PRO'S

- GreenGuard Certified
- Mould Resistant
- 100% VOC free
- 94% Recycled Materials
- Anti-fracture
- Suitable for most internal substrates
- Float , nail down
- Underfloor heating approved
- Amazing Acoustic Reductions
- Soft underfoot
- Need Fabric shears / scissors to cut
- For non-moisture critical area

Supplied as the acoustic underlayment with Auslay Flooring's Casa Collection NBP.  
( no back padding fitted to the SPC hybrid plank )

Insulayment has very good acoustic reduction. It is ideal for non-moisture present areas. It eliminates substrate movement from transferring through to the floor board and also allows hybrid to float correctly when installed. Float install over or nail down applications.

*The perfect underlayment for installing over timber floors or cracked concrete*

- SPC Hybrid flooring
- Laminate flooring
- Engineered and timber flooring
